AI Membership Safety Checklist

ChatGPT · Grok · Claude · Gemini

01 BEFORE PAYMENT

- Confirm the account can sign in; check plans, trials and pending orders.
- Record whether billing is web, App Store, Google Play or third-party.
- Use official pages for plans, prices, limits and availability.

02 MINIMUM DATA

- Never share passwords, verification codes or recovery codes.
- Sessions, SSO and User IDs belong only in a verified flow.
- Gemini has own-account, delivered-account and family-sharing options.

03 VERIFY AFTER PAYMENT

- Separate bank authorizations, receipts, store subscriptions and entitlements.
- Check the original billing channel, then the official product page.
- Keep the order ID, time, purchasing account and a masked plan screen.

04 IF THE PLAN IS MISSING

- Stop and do not pay again; confirm the account and sign-in method.
- Send incomplete charges to billing and missing entitlements to product support.
- Use the original order when contacting ChongGrok about its order.

Passwordless is not risk-free. Do not repurchase while a charge is complete or pending.

Product data and verification boundaries

ChatGPT	Sensitive session; sign out and back in afterwards
X / Grok	New joint subscription uses sensitive SSO credentials
SuperGrok	Legacy orders use User ID, not the new SSO flow
Claude	Personal Pro via manual iOS purchase; User ID only if needed
Gemini	Own-account, delivered-account and family plans differ

Evidence to keep

- Product, plan, term and original billing channel
- Order ID, receipt, transaction status and exact time
- Masked account identifier and official plan screen
- Error message, device environment and attempted steps

Independence and risk disclosure

ChongGrok is independent and not officially partnered with the AI providers.

Plans, prices, limits, availability and refunds are controlled by each provider.
